Journal of Electroanalytical Chemistry 443 (1998) 291–292

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Volume Contents

Preliminary notes

A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number
H. Zhou, Z. Shi and S. Dong 1

Solvent trapping during the self-assembly of octadecanethiol monolayer on roughened gold electrodes from surface-enhanced Raman scattering studies
A. Kudelski and P. Krysiński 5

Regular papers

Photocurrent and excess microwave reflectivity at semiconductor/electrolyte junctions I. Minority carrier profiles
G. Schlichthörl and H. J. Lewerenz 9

Electrochemistry of GaAs/AlGaAs superlattice electrodes in acetonitrile solutions with metallocene redox couples
D. K. Watts and C. A. Koval 33

Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms
J. Navarro-Laboulais, J. Trijueque, J. J. García-Jareñ, D. Benito and F. Vicente 41

The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films
K. Roßberg, G. Paasch, L. Dunsch and S. Ludwig 49

Electrochemical and mass measurements during small voltage amplitude perturbations of conducting polyaniline films
H. N. Dinh and V. I. Birss 63

Molecular dynamics study of alkali cations at the water throughout liquid mercury interface
G. Tóth 73

Identification of different silver nucleation processes on vitreous carbon surfaces from an ammonia electrolytic bath
M. Miranda-Hernández, M. Palomar-Pardavé, N. Batina, I. González 81

Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide
M. J. Samide and D. G. Peters 95

The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications
Y. Gofer, J. G. Killian, H. Sarker, T. O. Poehler, P. C. Searson 103

Low-temperature ionic conductivity of relevant solutions and dof SiO_2 gels before and after exchanges in propylene carbonate solutions
M. Wasiucionek and M. W. Breiter 117

Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon
M. Palomar-Pardavé, I. González, A. B. Soto and E. M. Arce 125

About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios
M. F. Bento, L. Thouin, C. Amatore and M. I. Montenegro 137

On the electrical capacitance of interfaces exhibiting constant phase element behaviour
P. Zoltowski 149

A methanol/dioxygen biofuel cell that uses NAD^+-dependent dehydrogenases as catalysts: application of an electro-enzymatic method to regenerate nicotinamide adenine dinucleotide at low overpotentials
G. Tayhas, R. Palmore, H. Bertschy, S. H. Bergens and G. M. Whitesides 155

Preliminary notes

Analytical solution corresponding to the *i/t* response to a multipotential step for a catalytic mechanism
A. Molina 163

New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions
B. Keita, L. Nadjo, R. Contant 168

Electrochromism of annealed vacuum-evaporated V_2O_5 films
Z.S. Guan, J.N. Yao, Y.A. Yang, B.H. Loo 175

Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon
E.-Y. Ting, M.D. Porter 180

Regular Papers

Advanced flow-through external pressure-balanced reference electrode for potentiometric and pH studies in high temperature aqueous solutions
S.N. Lvov, H. Gao, D.D. Macdonald. 186

Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm
E. Laviron, L. Roullier 195

Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide
J.E. Baur, T.W. Spaine 208

Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties
O. Stéphan, P. Schottland, P.-Y. Le Gall, C. Chevrot, C. Mariet, M. Carrier 217

Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions
M. Rueda, R.G. Compton, J.A. Alden, F. Prieto 227

Mechanistic study of the autoxidation of reduced flavin and quinone compounds
H. Tatsumi, H. Nakase, K. Kano, T. Ikeda 236

Cyclic voltammetry at constant sphericity
F. Martínez-Ortiz, M.L. Alcaraz, I. Roca, M. López-Tenés 243

Clay-modified electrodes as studied by the quartz crystal microbalance: redox processes of ruthenium and iron complexes
K. Yao, K. Shimazu, M. Nakata, A. Yamagishi 253

Contribution to the study of square wave voltammetry in the case of simple irreversible reactions
N. Fatouros, D. Krulic 262

Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes
L.M. Goldenberg, A. Donat-Bouillud, M. Leclerc, M.C. Petty 266

Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7)
Y.-F. Yang, G. Denuault 273
